Salt mine flights start next week at the 2025 FAI F1D European Championships for Indoor Model Aircraft in Slănic Prahova

Lausanne, Switzerland, 19 November 2025 – **The 2025 FAI F1D European Championships for Indoor Model Aircraft begins on 24 November in a unique location: the salt mine in Slănic Prahova, Romania.**

The mine operated during the early 20th century, but since the 1970s these vast underground chambers with their **unpolluted, stable air conditions** have mostly hosted medical and leisure visitors. Numerous FAI Indoor Model Aircraft championships played out against the **spectacular natural beauty** of the cavern walls.

Organised by the Romanian Aeromodelling Federation, the 2025 FAI F1D European Championships for Indoor Model Aircraft will bring together Europe's finest indoor free flight competitors for an **event showcasing precision, skill, and aeronautical artistry** from 24 to 27 November.

F1D Indoor Model Aircraft are **one of the two lightest FAI classes**, with a minimum weight of 1.2g for the airframe. These featherlight models are built with balsa wood and micro-film, with the addition of a rubber motor weighing less than a gram.

The aircraft may be light, but this class of aeromodelling is nonetheless one of the most technically demanding. Pilots with a supremely gentle touch can manage **long-duration flights**. In 2024, Yuan Kang Lee (USA), the World Champion in F1D, achieved a flight of 58 mins 38 secs - the current FAI world record.

*"Hosting the F1D European Championships in Romania is both an honour and a celebration of our **country's strong aeromodelling tradition**,"* said Corneliu Mangalea, the Secretary General of the Romanian Aeromodelling Federation. *"We are proud to welcome athletes, officials, and enthusiasts from Europe to experience the spirit of innovation and excellence that defines our sport."*

The event will include both **senior and junior categories**, as well as a World Cup for F1D prior to the main event. Spectators, media representatives, and aeromodelling fans are invited to attend and witness the quiet elegance of human ingenuity in flight.

Schedule

- 24 November: Model processing, Officials' Meetings, Opening Ceremony
- 25-27 November: Competition rounds
- 27 November: Finals, Closing ceremony.

Editor's note

FAI will cover the competition with updates on the FAI website and social media channels.
