

## **CIEA**

( <http://www.fai.org/education/meetings/2009> )

Last year's meeting was held in Lausanne on Friday 24 and Saturday 25 April 2009. I attended as a guest (no voting rights).

### **1. Generation issues : proposals for practical solutions**

President Kasteleijn shared with the Delegates the fact that it is difficult to find speakers on generation issues especially for small groups and no budget. Then, he proposed 2 projects to be developed:

- Why fly? (question-answer program)
- Junior squad (group – process in mix of reality and virtual contacts).

The Commission decided to develop the WHY FLY program based on following elements

- a) aim : education and public relation for all generations
- b) cooperation : with IAOPA + others
- c) vehicle : web, print, film
- d) content : new technology
- e) inventory : check what is already done by IAOPA, NAC, ESA, NASA + all space agencies
- f) how to get questions to attract people and promote FAI
- g) project working group : MM. Kasteleijn, Twigg, Pré, Strienz, Hoff and Théodoloz.

President Kasteleijn will lead the working group.

### **2. 2011 Art Contest**

As 2011 is the 50<sup>th</sup> anniversary of Yuri Gagarin's first flight into space, I suggested that the theme "Manned Space Flight" might be appropriate.

### **3. NASA report**

I gave a brief statement about Shuttle flights for 2010 and the end of the Shuttle programme based on information provided by the US delegate at our 2009 ICARE meeting.

### **4. 2010 Meeting**

This year's meeting will be held in Naples on Friday 23 and Saturday 24 of April. I will attend.
